The project

Ethics in business, corporate social responsibility and sustainable development of businesses have been gaining importance during the last decades.

This is related not only to increasing awareness of entrepreneurs but also to practical implications.

Socially responsible business does not focus only on generating profit, administrative and financial issues, but has also positive influence on environment, local communities and all participants, who are involved in social and economic activity.

Implementing the assumptions of CSR, sustainable development and other ethical issues is a must in the present world of business activity.

In many European countries the great majority of enterprises consist of small and micro businesses (in EU more than 90% according to Eurostat) providing around 60% workplaces, often run by sole traders.

The issues of CSR and sustainable development have been the concern of mainly big companies and international corporations.

The main objective of the project **ISORESS - Promoting the idea of corporate social responsibility and sustainable development in small and medium enterprises** is to promote the idea of CSR and sustainable development also in small and micro enterprises, including those run by migrants by introducing relevant training programmes, sharing and transferring innovative practices, presenting benefits from applying the ideas to their own business practice.

Corporate Social Responsibility (CSR)

What is CSR?

The European Commission has defined CSR as the **responsibility of enterprises for their impact on society**. CSR should be company led. Public authorities can play a supporting role through a smart mix of voluntary policy measures and, where necessary, complementary regulation.

Companies can become socially responsible by:

- ✓ following the law;
- ✓ integrating social, environmental, ethical, consumer, and human rights concerns into their business strategy and operations.

Why is CSR important?

- ✓ **In the interest of enterprises:** CSR provides important benefits to companies in risk management, cost savings, access to capital, customer relationships, HR management, and their ability to innovate.
- ✓ **In the interest of the EU economy:** CSR makes companies more sustainable and innovative, which contributes to a more sustainable economy.
- ✓ **In the interests of society:** CSR offers a set of values on which we can build a more cohesive society and base the transition to a sustainable economic system.

Benefits of CSR

- ✓ it helps in improving financial performance
- ✓ enhanced brand image and reputation
- ✓ increased customer loyalty and sales
- ✓ increased ability to attract and retain employees
- ✓ easier access to capital
- ✓ help to improve employees moral and motivation
- ✓ help in complying with statutory regulations

Classification of CSR practices

1. The Environment

Socially responsible companies...

- a) manage available natural and energy resources efficiently, which are major environmental CSR goals relevant for all stakeholders,
- b) provide opportunities for cost savings and revenue generation,
- c) influence overall brand strength through positive environmental reputation - if they see you better, they want to work with you more willingly (both employees and investors)
- d) view environmental stewardship as a key social responsibility alongside product safety and quality,
- e) follow the principles of reducing, reusing, recycling and responsible disposal,
- f) adopt sustainable development principles,
- g) provide environmental education to their staff/workers,
- h) conduct a waste reduction policy and processes related to waste management.

2. Fair Operating Practices

Socially responsible companies...

- a) comply with laws and regulations, and conduct transparent and fair corporate activities with a strong commitment to ethical behaviour,
- b) try to handle transactions based on healthy, fair and equal partnerships with business partners (by acknowledging that, even if we outsource business to them, we will be ultimately held accountable for the relevant products and services),
- c) respect local culture and customs,
- d) offer equal wages for women and men,
- e) create space for employees' rest,
- f) introduce a clear promotion system,
- g) support female employees' career development,
- h) promote employment of people with disabilities,
- i) implement/provide career training for employees, young and old, at various stages in their careers,
- j) treat employees fairly and ethically.

3. Consumer Issues

Socially responsible companies...

- a) work to provide high quality and safe products as well as services,
- b) prioritize the customer's perspective,
- c) provide a broad range of products and services,
- d) strive to meet the customers' needs and give them a wide range of products and services,
- e) contribute to building societies where everyone can enjoy a lifestyle of convenience and comfort (companies should be working towards this goal to respond to the diverse needs of customers regardless (such as age, physical and mental abilities, economic circumstances and cultural background),
- f) offer training to the community on healthy and responsible consumption.

4. Community Involvement & Development:

Socially responsible companies...

- a) build a better future through collaborative creation,
- b) recognize the value of community interaction and utilize their operational strengths in actively supporting the local community through projects that bolster involvement and development at the local level,
- c) collaborate with various stakeholders in carrying out a diverse range of community activities with the aim of achieving coexistence with society, such as youth development, creation of cultural diversity, assistance for local community development, and environmental preservation,
- d) examine and implement measures to establish longer-term relationship with communities,
- e) implement community support activities,
- f) purchase from small local producers directly, with no intermediaries.

5. Human Rights:

Socially responsible companies...

- a) support and respect the protection of internationally proclaimed human rights,
- b) make sure that they are not complicit in human rights abuses,

- c) promote compliance with the labour standards of the *International Labour Organization* (ILO), including the ban on child labour, the ban on forced labour, equality of opportunity and treatment, and freedom of association,
- d) support the *International Land Coalition* of civil society and human rights organisations, knowledge institutions and intergovernmental organisations,
- e) respect the right to a private and family life,
- f) respect the right not to be discriminated against because of your sexuality, for example.

6. Labour Practices:

Socially responsible companies...

- a) improve safety and health of employees,
- b) provide good working conditions for their employees,
- c) motivate their employees by “working experiences” and involving them in the whole process,
- d) promote team work concept,
- e) create work environment that embraces diversity in human capital (promote work-life management),
- f) raise health and safety management levels across the group through promotion of global health and safety management,
- g) provide health and productivity management.

The Good Practice Guide

This Guide is a collection of 94 good practices of CSR and SD performed by micro and small companies located in 6 countries (Germany, Greece, Italy, Macedonia, Poland and Spain) by the six partners of the ISORESS project.

It's meant as a tool for entrepreneurs and managers to get inspiration for introducing elements of CSR and SD in their business.

The good practices refer to companies of micro and small size (0 to 50 workers), active in the agriculture, manufacture and services sectors. Some of the companies are for profit, some non-profit and other are social enterprises.

The Good Practices collected in this guide are classified according to the 6 core areas:

- ✓ Environment
- ✓ Fair operating practices
- ✓ Consumer issues
- ✓ Community involvement & development
- ✓ Human rights
- ✓ Labour practices

Good practices

Germany

1. Siebold/hamburg messebau GmbH

Type of company	Profit
Business sector	manufacture
Number of staff	26-50
Background of the company/organization	The siebold/hamburg messebau GmbH specializes in the design, planning and implementation of temporary architecture and interior design. The company creates trade fair appearances as well as concepts for road shows and events. The designs are developed and manufactured as well as set up and dismantled
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Labour practices ✓ Environment ✓ Consumer issues ✓ Community involvement & development
Short description of the good practice	<p>Labour practices / Community Involvement: A reduced-emission exhibition stand design and the reuse of the materials used in trade fair construction are key corporate principles of siebold / hamburg messebau GmbH. Materials that are no longer needed are left to kindergartens and schools for their equipment and creative work. Over ten percent of those employed in the company are people with disabilities, which is significantly more than the legal employment rate of five percent. Part-time work is individually agreed and parental leave is also offered and perceived for fathers. Also the commitment in the refugee employment with one training place and with internships on request.</p> <p>Environment / Consumer Issues: Upon customer request, the booths offered can be made climate neutral using an environmental accounting tool. Two of the company's three commercial vehicles run on pure electric propulsion and are powered by electricity from their own photovoltaic system. The premises were equipped with a photovoltaic system, a combined heat and power plant and skylights and the entire lighting was converted to LED.</p>

2. Das Caféhaus LANGES e.K.

Type of company	Profit
Business sector	manufacture
Number of staff	16-25
Background of the company/organization	Classic pastry shop, with café and out-of-home operation. Own organic coffee roasting, own beekeeping, own jam production, regional purchase, seasonal goods, daily fresh products, open daily.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Environment ✓ Community involvement & development
Short description of the good practice	<p>Environment: It is the company's understanding to influence steadily and positively our environment. Energy-efficient, ecological company with its own power generation, recording and evaluating all the company's electrical consumers (e.g. machines, light, etc.) and their partial replacement or elimination. Small wind power plant, photovoltaic system, cogeneration plant for own power generation, LED, motion detectors, energy optimization system, heat recovery system, block refrigeration system and induction cooker led to savings in energy purchasing, big CO2 savings, newer machines.</p> <p>Community involvement & development: It is a family friendly operation with daily support of three food banks for welfare recipients and the social project "Milchkanne" (offering food for socially weak children). Taking part in charity projects. These activities result in a high commitment of employees with several years of average service of staff, very low sick leave (below 0.7%), positive feedback from the customers and more applications from future apprentices.</p>
Source of information	http://www.dascafehaus.de/

3. Orthopädie-Schuhtechnik-Schwarzenberg GmbH

Type of company	Profit
Business sector	manufacture services
Number of staff	26-50
Background of the company/organization	Orthopädie-Schuhtechnik-Schwarzenberg GmbH is family business combining tradition, modernity and quality with an environmentally friendly sense for many years. They are offering orthopaedic shoes and have created a holistic and extensive offer for their customers.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Labour practices ✓ Environment ✓ Fair operating practices ✓ Community involvement & development
Short description of the good practice	<p>The combination of traditional craftsmanship with health and the environment is the guiding principle of the management.</p> <p>Environment/labour practices: Use of low-emission materials and extraction systems, two cogeneration units, a photovoltaic system and the use leather remainders result in a sustainable and environmentally friendly approach throughout the company.</p> <p>Fair operating practices/Community Involvement: Free participation in the back-school courses during working hours, free participation in the English course in the company, reimbursement of training costs by the company and individual working time regulations support the satisfaction and motivation of employees, thereby improving health-related aspects. Moreover, some local activities and charity projects are supported in order to increase product performance as well as positive external communication.</p>
Source of information	https://ost-szb.de/

4. Papaya Tours GmbH

Type of company	Profit
Business sector	services
Number of staff	16-25
Background of the company/organization	Papaya Tours is a tour operator specialized in the destination of Latin America. It offers authentic country experiences with cultural encounters and up-close nature and animal experiences. It stands for best value for money, high quality, sustainability and passion for travel.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Environment ✓ Consumer issues
Short description of the good practice	<p>Environment:</p> <p>As a tour operator visiting foreign cultures and sensitive ecosystems Papaya Tours GmbH has a great responsibility to arouse understanding and enthusiasm among the customers for the nature and the people in the Latin America as well as to benefit the local population in tourism to the fullest extent possible.</p> <p>Together with the partner offices, a uniform guidebook has been developed, which provides the tour guides with the company's philosophy and offers guidelines for sustainable travel.</p> <p>Consumer issues:</p> <p>In Peru, a first tour guide training was carried out. As a result, the travels have improved qualitatively through the training of the guides and the provision of guidelines, which can be proved by the customer feedback.</p> <p>In 2011, Papaya Tours received the "CSR Tourism certified" quality seal for the first time. This required an elaborate analysis of the company to create an improvement program with concrete measures to optimize sustainability.</p> <p>Through CSR officers, a continuity of "becoming sustainable" can also be guaranteed in day-to-day business.</p>
Source of information	https://www.papayatours.de/

5. SPEICK Naturkosmetik

Type of company	Profit
Business sector	manufacture
Number of staff	26-50
Background of the company/organization	As a family-owned company with a long history, Speick is to produce natural cosmetics with the high-alpine, harmonizing Speick extract - exclusive worldwide. Since 1928, the brand Speick stands for sustainable corporate management in all areas.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Environment ✓ Fair operating practices ✓ Consumer issues
Short description of the good practice	<p>Sustainability is the company's highest priority and thus forms the focal point in their everyday life. Thanks to a committed management, the goal of sustainability is pursued through activities such as: transparent and clear corporate structure, balance of financial resources, responsible use of energy and raw material resources, emissions and waste control, fair trade with all business partners and fair pricing policy.</p> <p>Environment / Fair operation practices: Carinthian alpine farming families pick the Speick plant by hand and thus earn an important income for themselves. Fair trade with farmers is a matter for the company which results in long-term safeguarding of biodiversity in the Nockberge Biosphere Reserve, the long-term socio-economic protection of alpine farming families and the long-term existence of Speick products.</p> <p>Consumer Issues: Organic product ingredients, environmentally friendly production methods, protection of biodiversity, ecologically sensible packaging, good biodegradability of the products and medium price segment for the largest possible consumer segment lead to the fact that consumers not only appreciate the quality of the products, but also their ecological, economic and social sustainability values.</p>
Source of information	www.speick.de

Type of company	Profit
Business sector	services
Number of staff	16-25
Background of the company/organization	Coffee Circle represents a new way of trading coffee. They started to give people access to the best coffees in Ethiopia and to sustainably improve the living conditions of coffee farmers and their families through direct trade combined with transparent development assistance.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Consumer issues ✓ Human rights
Short description of the good practice	<p>Consumer issues: Responsibility and sustainability are based on transparency and authenticity. To create this for the coffee market, Coffee Circle has set itself as a core task. They provide customers with transparency about the product coffee in order to make the correct decision and to consume responsibly and sustainably.</p> <p>Human rights: When purchasing, customers also choose their own development project in the coffee cooperatives, which is supported by Coffee Circle with 1 Euro per kilogram.</p> <p>Core topics with measures and results: Credibility is proved by project videos which are creating transparency and gaining trust from their customers. Knowledge transfer is provided by workshops with the company's own "Coffee Academy" which results in mature (future) customers who value the product and actively select it. Social Business with a Social Startup Kit educating on social entrepreneurship to inspire and to motivate potential imitators.</p>
Source of information	www.coffeecircle.com
7. dwp eG Fairhandelsgesellschaft	
Type of company	Profit
Business sector	services

Number of staff	26-50
Background of the company/organization	The dwp eG Fairhandelsgenossenschaft imports foods (e.g. coffee, tea, spices, mangoes) and handicrafts at fair prices and conditions - such as organic and social supplements and pre-financing - and as a wholesaler supplies organic food shops throughout Germany, Austria and Switzerland with fair trade products. Private customers also receive the majority of dwp's fairly traded products in the online shop.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Environment ✓ Fair operating practices ✓ Community involvement & development ✓ Human rights
Short description of the good practice	<p>dwp relies on the partnership with 60 smallholder and small producer groups and promotes environmentally and socially responsible development. dwp stands for an end-to-end fair-trade chain from producers to consumers and consciously assumes ecological and social responsibility in its own country.</p> <p>Human rights: Fair prices, interest-free pre-financing, bio and social supplements, direct contacts to 60 overseas producers lead to improved income conditions and new perspectives for approximately 50,000 families worldwide. Together with Philippine Child Protection Center Preda the dwp has been providing active support for campaigning against sex tourism and child prostitution for many years</p> <p>Fair operating practices: Reintegration of mentally ill people into the primary job market and training offers for adolescents with learning difficulties or autism help to create meaningful work tasks for more than 50 clients according to their abilities</p> <p>Environment/Community involvement: Global and regional: 40 regional juice blends apple mango offer fair incomes for small producers in Germany and the Philippines as well as the preservation of orchards and biodiversity</p>
Source of information	www.dwp-rv.de

8. MVG Medienproduktion und Vertriebsgesellschaft mbH (GmbH)	
Type of company	Profit
Business sector	services
Number of staff	26-50

Background of the company/organization	MVG offers comprehensive services in the areas of lettershop, mailings, fulfilment and production management. As a mail order company and publisher, they are active with the distribution of fair trade products and one-world publications.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Environment ✓ Fair operating practices
Short description of the good practice	<p>As a company with ethically motivated goals, they pursue a value-based management approach of CSR. The core values of competence, performance, fairness and sustainability are firmly anchored in the corporate philosophy and determine every aspect of their entrepreneurial activities.</p> <p>Environment: Due to an environmentally friendly media production with the fully commitment of in-house productions to green paper, carbon-neutral manufacturing and carbon neutral shipping convinced the majority of customers for green media production (and environmentally friendly shipping options) through extensive consulting. The "Fair Gifts" initiative helps that every year, the number of companies that decide to give their business partners food presents from Fair Trade increases. This does not only actively promote fair trade, but also increases the level of awareness of fair trade products.</p> <p>Fair operating practices: Promotion of part-time degrees: During their time at MVG, 12% of employees either already completed a part-time university degree or are currently studying. The study is supported by the company through financial means and/or flexible working time models.</p>
Source of information	www.eine-welt-mvg.de

9. Thomas Becker - Atelier für Schmuck

Type of company	Profit
Business sector	manufacture
Number of staff	0-9
Background of the company/organization	The goldsmith manufactures high-quality wedding rings, unique jewellery and small series of environmentally friendly and fair trade precious metals and gemstones. In addition, the refurbishment, repair and recycling of jewellery, coins and dental gold are part of the service offer.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Environment ✓ Fair operating practices
Short description of the good practice	<p>The jewellery studio lives a global bond in a dialogue based on partnership and respect for man and nature. The company creates eco-social and economic profit as shared value by implementing CSR internally, communicating it externally and developing a sustainable value-added system through strategic partnerships.</p> <p>Environment: Eco-fair material procurement with the Young Leaders Project (with Oro Verde) leads to increased competence; self-sufficiency; creation of value on site; protection of biodiversity and climate; continuous material delivery.</p> <p>Fair Operating Practices: Individualized working conditions (flexible + individual models for working hours and place of work) mean better reconciliation of work and family life (work-life-balance); higher performance due to less stress; know-how transfer for the benefit of the company; continuity of employment.</p> <p>Continuous development of the mission statement: orientation for self-responsible action; orientation for customers, suppliers and other stakeholders; high identification of employees through active participation; individual development of professional and personal skills; low error rate; low absence rate.</p>
Source of information	http://www.tbschmuck.de/

10. Rhanerbräu GmbH & Co. KG	
Type of company	Profit
Business sector	manufacture
Number of staff	16-25
Background of the company/organization	The Rhanerbräu brewery was founded in 1283 and has a tradition of more than 730 years. It is located in the rural region of East Bavaria near Cham. It is among the 15 oldest companies in Germany and also among the 5 oldest breweries in the world.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Environment ✓ Community involvement & development
Short description of the good practice	<p>On the one hand, the brewery is traditional but on the other hand full of innovative ideas.</p> <p>Environment:</p> <p>The company feels obliged to the Bavarian brewing art and the so-called Reinheitsgebot (German Beer Purity Law) from the year 1516 which announced that beer should be made only from hops, malt, yeast and water. Rhanerbräu is proud on not artificially altering its beer. The variety of brewing ingredients solely creates a wealth of flavours that give each variety its unique character - and that with only the four ingredients.</p> <p>The brewery is technically up to date and has also invested in an environmentally friendly energy supply: on the premises there is a separate biomass cogeneration plant. It is hidden in the building of the largest beer crate in the world. This makes this functional building a local architectural attraction that attracts potential customers.</p> <p>Community Involvement:</p> <p>Once a week there is a special brewery tour with an actor who teaches visitors about this concept.</p>
Source of information	https://www.landkreis-cham.de/media/2668/champions_gesamtausgabe.pdf

11. boeba Montagen- und Aluminium-Bau GmbH

Type of company	Profit
Business sector	manufacture
Number of staff	26-50
Background of the company/organization	Boeba Montagen- und Aluminum-Bau GmbH is a Berlin-based metal construction company in the district of Neukölln. About 25% of the population in Neukölln have a migrant background.
Classification of CSR practice	✓ Fair operating practices
Short description of the good practice	<p>Fair operating practices:</p> <p>Boeba Montagen- und Aluminum-Bau GmbH has about 50 staff members, among which 17 were not born in Germany. Three of them are people with refugee background and some have been in Germany for less than one year: a 25-year-old aluminium welder, country of origin Iran; a truck driver in his early 30s from Egypt and Mohammed (28) from Mali, they are Boeba's new trainees.</p> <p>Integration gives the company the opportunity to fill jobs in the long term, which is becoming increasingly difficult due to demographic trends in Germany and the emerging skills shortage. They are winner of the national CSR prize 2017 in the category "Vocational integration of refugees". The appreciation of the CSR prize makes the small and large internal efforts for socio-economic cooperation between companies and society visible to the outside world. It is a recognition of their activities, which motivates them to pursue this topic sustainably, even facing a current political debate.</p>

12. Schmauder & Rau GmbH

Type of company	Profit
Business sector	manufacture
Number of staff	26-50
Background of the company/organization	Schmauder & Rau GmbH acts as a car dealer and a free car repair shop. The offer includes not only sales of new and second-hand cars but also repairs, regular checks, etc. They are located in Baden-Württemberg, the south-western area of Germany.
Classification of CSR practice	✓ Fair operating practices
Short description of the good practice	<p>As a regionally active enterprise, they feel obliged to align the corporate goals with business, social and ecological principles. In different projects they support the idea of sustainable responsibility.</p> <p>Fair-operating practices: The big wave of refugees that broke over Germany in 2015 was a reason for new activities. Regardless of political considerations, Schmauder & Rau see as their task to make a contribution, at least to help on a case-by-case basis. In doing so, they have been making positive experiences with the employment and training of refugees for many years. A 22-year-old Iraqi is currently learning the job of a construction / metal painter specializing in vehicle painters. Last but not least, his experience has helped Schmauder & Rau to continue to engage refugees in their business. Be it as an internship, a trainee or as a regular staff member. Making refugees to colleagues is the aim of the company and they are proud of having the commitment of their team. For this reason, they were awarded the CSR Prize of the Federal Government in the category of "Vocational integration of refugees".</p>

13. VATHOS Apparel

Type of company	Profit
Business sector	Services
Number of staff	<50
Background of the company/organization	VATHOS Apparel is an ethical, contemporary label committed to eco-wise and socially responsible fashion in Greece. Their story stems from the desire to explore fashion through spiritual motivation, to act with responsibility towards people and the planet and develop a sense of moral integrity within the fashion industry.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Environment ✓ Human rights
Short description of the good practice	<p>Environment: Vathos Apparel uses 100% organic certified cotton which is grown without the use of toxic pesticides or fertilizers. During the dyeing process, only Global Organic Textile Standard (GOTS) certified colours are used. By using organic fabrics, the company helps to reduce the environmental impact and improve the lives of textile workers around the world.</p> <p>The packaging incorporates environmentally friendly materials and all boxes are made of 100% recycled paper. VATHOS APPAREL labels has been produced with respect to the environment and humanity. For e-shop's deliveries the company chooses DHL. DHL, with its green products and services, tries to reduce climate-damaging CO2 emissions and other environmental impacts which occur during the transportation and storage of goods. They achieve this through the Go Green Solutions; optimized transport routes, vehicles with alternative drive systems and energy-efficient warehouses.</p> <p>Human rights: To support fair and ethical trade, the company co-operates with individuals or businesses who carry out their activity within the framework of fair play and respect to human rights. They also adopt practices which inflict minimal or no harm to the natural environment.</p>

18. B&T Composites S.A.

Type of company	Profit
Business sector	manufacture
Number of staff	<50
Background of the company/organization	The Company B&T Composites S.A. is specialized in the manufacturing of advanced composites components. Offering total solutions – from preliminary designing to engineering, manufacturing and testing – covers a wide range of application fields, focusing on quality, reliability, safety and efficiency.
Classification of CSR practice	✓ Environment
Short description of the good practice	<p>In the last years the company has completed an innovative exploitation system of solar energy. With the installation of 16 solar panels, B&T managed to collect solar energy that heats water. With the appropriate piping system, the water is fed into the polymerization furnace which keeps it at a constant temperature of 100 ° C. This requires much less electricity use with significant economic and environmental benefits. At the same time, the heating system of the facility is also being strengthened. The solar energy system in the production area makes the building self-contained and "green". The domes mounted per meter on the roof of the factory can diffuse light into the interior. Thus, a large amount of electricity needed to adequately illuminate 9,000 sqm of installations is saved.</p> <p>Rain water is collected in tanks and used for water supply for the surrounding area and sanitary facilities. The recycling of paper, plastic, metal, batteries is an important priority for the company.</p>

24. IOPrint s.r.l.

Type of company	Profit
Business sector	services
Number of staff	10-15
Background of the company/organization	The company offers innovative and quality solutions and systems for office automation, helping the customer to improve productivity with reliable and high-performance work tools. The products and procedures that the company offers to its customers aim to reduce costs, increase efficiency and improve environmental sustainability.
Classification of CSR practice	✓ Environment
Short description of the good practice	<p>Some IOPrint management policies have been activated to reduce the company's environmental impact.</p> <p>De-materialization of archives and information: scanning, digital archiving and cloud processes reduces the use of paper, thus contributing to reduce the environmental impact. Moreover, IOPrint preferably deals with low consumption and low environmental impact instrumentation and machinery: this choice is also sponsored to customers.</p> <p>Disposal of special waste: IOPrint does not produce special waste or require specific precautionary treatment, however the acquisition of new materials and the disposal of obsolete materials creates a waste flow that are treated with the utmost care. The material for company use (e.g. toner and printer cartridges) is periodically disposed of through a specialized company. Disused machinery is scrapped and withdrawn by the supplier companies or through appropriate solutions for the disposal of electrical and electronic equipment.</p> <p>Packaging material and disused materials: are disassembled and stored so that they can be periodically collected and disposed of according to the municipal guidelines for the separate collection of waste: in this way we increase the possibility of recycling and, possibly, the reuse of waste materials.</p>
Source of information	http://www.ioprint.it/

25. Aegis Human Consulting Group

Type of company	Profit
Business sector	services
Number of staff	26-50
Background of the company/organization	The company started in 2002 as a recruiting firm specializing in the FSI (Financial Services Industry) following the will of three partners with extensive experience in the field. Today, Aegis Human Consulting Group (AHCG) is one of the main players in the Italian market.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Labour practices ✓ Consumer issues
Short description of the good practice	<p>In 2017 the company was awarded as one of the best workplaces in Italy. The company adopted a Code of Ethics that reflects their core values and includes the principles that guide their choices, from strategic to operational ones. Some of the most relevant principles are:</p> <p>Loyalty: Develop and maintain relationships based on credibility and respect of the commitments made.</p> <p>Confidentiality: Use extreme care in handling of the information processed, ensuring that they are not disclosed to third parties unless authorized.</p> <p>Transparency: Ensure greater access to information to all interested parties, rejecting any form of concealment or deception.</p> <p>Responsibility: Operate always consciously and, if necessary, account for their behaviour and choices to the Ethical Committee of the company.</p> <p>Fairness: Pursue their goals repudiating all forms of religious discrimination, political, sexual, ethnic, registry.</p> <p>Objectivity: Expressing objective rating based on facts avoiding any kind of prejudice and preconception.</p> <p>Conflict of Interest: Avoid potential conflict of interest situations in which personal or family economic activities and tasks covered in society are such as to interfere with or affect the ability to carry out their work impartially.</p>
Source of information	www.aegishcgroup.com

26. Nuova IZC Costruzioni Generali

Type of company	Profit
------------------------	--------

Business sector	manufacture
Number of staff	10-15
Background of the company/organization	The company realizes private and public building restorations, renovations and provides small and medium-sized maintenance. The company pays great attention to energy efficiency in new buildings, but particularly in structures undergoing restoration or renovation.
Classification of CSR practice	✓ Environment
Short description of the good practice	<p>The company aims to contribute to the design and construction of buildings with low environmental impact.</p> <p>The construction sector has an important role and responsibility in the environmental impact. In fact, designers and builders can direct customers' choices towards solutions that rationalize the use of energy resources, thus fostering the environmental and economic sustainability of new and renovated buildings. Nuova IZC Costruzioni Generali is able to guarantee eco-sustainable processes and products that are characterized by the low environmental impact.</p> <p>Construction products that have environmental certification are preferably used. This kind of products are manufactured through controlled emissions processes that do not feed the greenhouse effect throughout the whole product life cycle (from construction, use, disposal).</p> <p>The company constructs buildings and houses with low energy consumption, using technologies and materials that allow buildings to have high levels of energy efficiency and consequently a low environmental impact.</p> <p>Improvement of the energy performance of refurbished buildings: the renovation activity respects two important characteristics: low land consumption, building on already built land, and the reduction of energy consumption.</p>
Source of information	http://www.nuovaizc.it

27. Alfio Zanella s.r.l.

Type of company	Profit
Business sector	manufacture
Number of staff	16-25
Background of the company/organization	The company, founded in 1914 as a lumber yard, today realizes, supplies and installs roofs and wooden roofs using modern design and new production technologies to combine tradition while innovating and updating products according to new market needs.
Classification of CSR practice	✓ Human rights
Short description of the good practice	<p>The main objective is to create a working environment characterized by mutual involvement and trust. This brings, as a consequence, better work performances. In particular, the company wants to improve internal communication, and therefore group work skills, and the degree of integration of foreign employees. To ensure a real sharing of values, methodologies and practices, to reach an optimal level of cohesion and communication between employees and to avoid the risk that an imperfect inclusion could occur in the company, it was decided to improve the integration of foreign workers (2 Brazilians and a Senegalese). To reach such an objective, an Italian language course, whose costs have been paid by the company, was organized. The owners of the company had therefore paid an Italian language teacher to hold an evening course (from 20:00 to 22:00) for a period of three months. The course had excellent results and the participation has been extended to friends and relatives of foreign employees, thus improving both the level of internal communication and the level of integration in host society. The organization and management of training, both for the Italian course and for the dissemination within the company of the principles of CSR, and the meetings with workers, during working hours, are, without a doubt, a cost for the company. The owners, however, think that the expenditure of economic resources, time and energy bring benefits that are higher than the costs.</p>
Source of information	www.alfiozanellalegnami.it

28. Stefano Pittis

Type of company	Profit
Business sector	services
Number of staff	0-9
Background of the company/organization	Stefano Pittis set up his own company in 1999 in Mortegliano (UD), after having worked for many years in the construction sector. In addition to constructions from scratch, Stefano Pittis has a long experience in renovation of inefficient or old buildings.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Environment ✓ Labour practices
Short description of the good practice	<p>Mr. Stefano Pittis has a great sense of belonging to the territory where he lives and works and therefore he tries to bring well-being and life quality to his community.</p> <p>Environment: To do so, he focused on energy saving and the use of renewable energy, researching high-quality and with low environmental impact housing solutions, bringing in his company a strong work ethic and positive human relationships. Focus on innovation, on the efficiency of the tools used, on the autonomy and growth of his workforce are considered of primary importance. Working with quality means use the most adequate material with the awareness of pros and cons regarding costs.</p> <p>Labour practices: Time and workload are calibrated to the real capacity of the workers. Safety equipment is constantly maintained and regularly checked -up. Safety is not only a law obligation but the best guarantee to continue to be effective and efficient in the future.</p> <p>The methods of managing human resources (training, safety, stability of work relationships, sensitivity, sharing methods, sharing values, trust within the organization, processes of delegation and responsibility) directly affect the quality of the work of each individual operator.</p>

29. Olio Arke'e Natura

Type of company	Profit
Business sector	agriculture

Number of staff	0-9
Background of the company/organization	The company is dedicated to oil production in the rural area of Serradifalco in Sicily. From 2001 a new entrepreneurial path began and in 2003 the actual Arké was born with a philosophy based on values, people and territory. Today the company exports internationally around 80% of the total oil production made in Italy.
Classification of CSR practice	✓ Environment
Short description of the good practice	<p>The company has improved their environmental performance by installing a 20-kilowatt photovoltaic system and using milling residues (pomace olive oil) for biomass. They have also installed a new 40-kw generation plant with the aim of becoming self-sufficient in energy. The company monitors good practice from other local businesses to remain at the forefront of environmental initiatives. Olio Arke'e Natura chose to become more environmentally responsible to reduce costs, preserve the local environment, and enhance their CSR strategy. This has provided their business with a valuable selling point, separating them from the competition, attracting publicity and winning new clients. The company has undertaken actions including using water saving devices, increasing recycling rates, developing communication materials, and raising the environmental education of staff to improve behaviour both inside and outside the workplace. Investments have also been made in the energy efficiency of the building, including the installation of external thermal insulation and energy efficiency lighting.</p> <p>Recording methods and measurable targets have been developed to monitor environmental performance in areas such as energy production and consumption (electricity and water bills) and the amount of waste sent for recycling.</p>

32. Bellelli S.r.l	
Type of company	Profit
Business sector	manufacture
Number of staff	16-25
Background of the company/organization	Bellelli Srl was founded in 1994 by Mr. Bellelli after a long experience in the automotive sector (plastic materials). The

	company is specialized in car and child seats production, bike accessories, products for early childhood, articles for gardening.
Classification of CSR practice	<ul style="list-style-type: none"> ✓ Environment ✓ Community involvement & development
Short description of the good practice	<p>Environment: Through a constant environmental analysis, Bellelli s.r.l. keeps track of raw materials and energy consumption. The company pursues an environmental protection strategy by: reducing cardboard packaging for the supply of semi-finished products through the use of metal or cages recycling used cartons; the use, where possible, of materials completely biodegradable or environmentally friendly; the indication, on all the instruction booklets, of the correct disposal of the product at the end of its use; the use, for some products, of packaging that make it possible to lengthen the life cycle of the packaging itself and its re-use; continue training and sensitization of all personnel on the correct disposal of warehouse and/or office waste.</p> <p>Community involvement & development: The company conceived a "Toy packaging" from which games can be obtained (castles, animals, etc.) cutting out the figures drawn on the packaging or which can be used as a toy carrier, thus stimulating the imagination and creativity of children.</p>
Source of information	www.bellelli.com

33. Talin Spa (VI)	
Type of company	Profit
Business sector	manufacture
Number of staff	16-25
Background of the company/organization	Talin Spa, founded in 1955, designs and manufactures seats and office furniture and accessories. The great attention to the evolution of technologies and production systems is at the base of the company's strategic choices. Today, ecological, recyclable, non-

	toxic and self-extinguishing ecological materials are used for most products.
Classification of CSR practice	✓ Fair operating practices
Short description of the good practice	The main objective of Talin Spa is to ensure economic, social and environmental sustainability of the company activities. The adoption of codes of behaviour and management systems requires a punctual and transparent management of relationships with employees, with the territory and with customers and suppliers and a timely check on the regularity and responsibility of the behaviours implemented. Talin Spa communicate outside and inside the company activities and strategies, also based on codes of behaviour. This choice has also an impact on the supply chain because they try to involve their suppliers hoping that the number of companies attentive to ethical issues will grow. The company asks suppliers to adhere to an ethical agreement paper, to ensure that Social Responsibility does not remain an isolated phenomenon but becomes "system". Suppliers are chosen not only on the basis of the economic convenience of their products but also to their "ethical" characteristics, such as, in the case of timber suppliers, those who pick up timber from forests for which exists a reforestation plan. This often leads to choosing the supplier maybe less convenient but that gives guarantees in this sense. Customer's attention for ethical and environmental problems is growing so this may in the future bring both public image and economic benefits for responsible companies.

34. Bar Centrale	
Type of company	Profit
Business sector	services
Number of staff	0-9
Background of the company/organization	Bar Centrale is a bar founded in 2014 that offers breakfast, quick lunches, snacks and beverages in the centre of Codroipo. Its success is linked to some key factors: the quality of the products, the pleasantness of the physical environment and, above all, the skills of the workers. The owner and all employees are women.

Classification of CSR practice	✓ Community involvement & development
Short description of the good practice	Bar Centrale encourages collaboration, listening and use of social skills of and within workers. In building relationships, they invest a lot on emotions, attention and in the deep understanding of their interlocutors. The staff is quick to react to contingencies and solve problems, is able to "influence" others positively, to promote the social image of the bar as a place where it is possible to share, discuss, and help each other to face real problems together. Bar Centrale mission is to create a stimulating environment and treat all customers with respect and dignity; to welcome the diversity of the customer as an essential part of doing business; to look for quality suppliers to always offer the best to their customers; to satisfy customer needs with courtesy, education and irony; to provide the host community with an opportunity for meeting and leisure; to understand the problems of the community in which it is located; to actively participate in social initiatives involving the territory; to buy, sell and use products (wherever possible) that enhance the territory; to infuse the value of social responsibility also in its workforce; to report the results of their social responsibility initiatives; to encourage all its business partners to share the values of solidarity, friendship and commitment to the territory. Bar Centrale is committed to provide information on the products offered to customers in a clear, complete, truthful and non-misleading way.

35. BT Burgmann (Arcugnano – VI)	
Type of company	Profit
Business sector	manufacture
Number of staff	0-9
Background of the company/organization	BT Burgmann since 1966 builds molding, turning, grinding and induction welding of small parts for mechanical seals. The philosophy of BT Burgmann is to create innovative products created on the basis of individual customer needs. The technical know-how, investment in research and development, technologically innovative processes are the guidelines that brings the company to the highest levels in its sector.

Classification of CSR practice	✓ Labour practices
Short description of the good practice	<p>BT Burgmann, probably due to the fact that "manual" work always attracts fewer Italian workers, has a very high percentage of non-EU workers. This fact brought the company to confront with a multi-ethnic and multi-cultural environment that could represent a "risk" factor in relation to cohesion and internal communication, but which turned to be a great opportunity. BT Burgmann focused on involvement of all staff in the process of business development, giving same opportunities to anyone, regardless gender or provenance, by promoting deserving foreign workers in key roles. This allowed the development of high technical skills and professional growth of all workers. BT Burgmann has implemented innovative management tools such as the Supply Chain Management and the Kanban method to improve not only work performances but also motivation and cohesion in the group. Bt Burgmann applies a business philosophy that underlies the concept of continuous training, communication at all levels, active involvement of all workers in improvement processes. The application of these management tools helped to promote and reinforce a greater internal cohesion, improving integration and group spirit.</p>

Conclusions

CSR grows at different rhythms and it varies from continent to continent, country from country, sector from sector and company from company.

As globalization has increased, so has the number of companies practicing corporate social responsibility (CSR) around the world. Social and environmental issues like global warming has been an underlying factor in this growing importance

Competition among firms has led to a broader view of the business' role in society, going beyond economic and legal factors and including also social aspects. Consumers value more the social and environmental performance of companies.

However, Corporate Social Responsibility (CSR) practices and performances vary across countries due to differences in political-economic institutions, such as the welfare state, labour unions, educational systems, financial systems etc.

The European Union (EU) has been the continent that first became a convert to the CSR movement. Several reasons fare for this. Although innumerable abuses took place along its history, in Europe there have been traditionally more CSR consistent values, norms and perceptions than in other areas of the world; European companies have tended to hold stronger and broader approaches to stakeholder relations.

The EC mandates that certain companies disclose non-financial information in their reporting, including how they manage social and environmental challenges, but it only applies to about 6,000 large companies.

This leaves out the predominant form of enterprise in the EU: SMEs.

Many of the business benefits of CSR are the same for firms of all sizes. Companies stand to gain engaged staff, an enhanced reputation, and lower long-run costs. But, small businesses may be interested in some other benefits.

For instance, creative CSR policies and social entrepreneurship can spur incredible innovation. Today's economy is increasingly knowledge driven. Companies of all sizes are reliant on their employee's creativity. For a small business that does not have an extensive research and development team, thinking about CSR can be a great way to transform the business and its products with fresh ideas.

Surveys continue to indicate that ethics and morals are the primary drivers of CSR in small business. Corporate Social Responsibility can improve local communities, lead to new business partnerships, and spur innovation.

Ultimately, these benefits improve the business.
